

## APPLIANCE UPGRADE PLAN

### Plan for when you should replace appliances and equipment.

**Appliance lifetimes vary** based on how they're used, if they're serviced, and many other factors. The best way to prepare for purchasing energy-efficient models is to know a little about your current appliances. If you make a plan for upgrades before something breaks down, you can take advantage of incentives from your local utility and other programs.

### Log the appliances in your home and make your plan.

Appliance	Date of installation	Last serviced	Average lifespan	Energy STAR?	When to replace
Space heating			Boiler 10-30 years Furnace 15-20 years		
Air conditioning			15-20 years		
Water heater			8-12 years		
Range/oven			13-20 years		
Refrigerator			14 years		
Dishwasher			10 years		
Washing machine			10-13 years		
Dryer			10-13 years
